*Leave the professional repair of your e-bike batteries to Liofit.*

*With us, you have a competent and reliable partner at your side. Invest in the future, focus on sustainability and careful use of resources.*

## Safety at Liofit

### Safety regulations for the repair of e-bike batteries

Repairing e-bike batteries requires specialist knowledge and strict compliance with safety regulations. Liofit ensures that all legal regulations and safety standards are strictly adhered to.

### Proper handling and storage

E-bike batteries contain lithium ions. At Liofit, we ensure that our technicians are trained to store batteries safely and transport them properly. Our workshops have special fire protection equipment for emergencies.

### Use of original spare parts

Liofit only uses original parts approved by the manufacturer to ensure the integrity of the battery and the safety of users and to avoid risks from substandard or incompatible parts.

### Environmentally friendly disposal

Liofit disposes of defective e-bike battery components in an environmentally friendly and legally compliant manner. Our trained employees minimize the environmental impact of handling hazardous waste. We are a certified waste management company with a waste management officer.

### Regular safety inspections

Our workshops are regularly inspected and audited to ensure that all work processes and equipment comply with current safety standards. We are ISO 9001 certified.

### Legally compliant documentation

Liofit keeps detailed records of all repairs to ensure transparency and quality assurance and to comply with legal requirements.

### Training and further education

Our specialists are continuously trained to ensure that our repair processes always comply with the latest technical and safety standards.

**Good to know:** As the distributor of the repaired batteries, we are liable for damage to the battery!

With Liofit, you can rest assured that your e-bike battery is in safe hands.

Strict compliance with all legal regulations and safety standards ensures that you can use e-bike batteries safely and reliably again after the repair.

Put your trust in Liofit - your expert for safe e-bike battery repairs.

## Legal conformity

### Ready for the change in the law from 2027?

#### Extract from the new EU regulation

*"From 42 months after entry into force of the Regulation, any natural or legal person that places on the market products incorporating LMT batteries shall ensure that those batteries, as well as individual battery cells included in the battery pack, are readily removable and replaceable by an **independent professional** at any time during the lifetime of the product."*

We are ISO 9001 certified and actively involved in EU legislation on battery repair. With us, you can be sure that you will continue to be legally compliant in the future.

**Liofit is to be recommended!!!**

A big thank you to the Liofit team. After searching the Internet, I came across the Liofit website and can only recommend it to others. My battery was repaired by the team without any problems, that's what I call sustainable.

Great communication, fair price, fast and smooth processing. I am simply thrilled.
